HARDWARE FOR READING AND PRINTING BARCODES

We offer a wide range of handheld **barcode scanners** (wireless and with cable) with functions for high loads in harsh industrial environments and for applications in retail and light industry.

Mobile terminals for data collection and processing from our partners outstand in robustness and durability. Terminals are used mainly in the areas of storage, retail and communication of mobile workers.

We offer **plastic card printers** from the smallest ones for printing cards at low volumes, up to performance printers with application of protective safety elements.

Our extensive portfolio of **label printers** (also called barcode printers) includes models suitable for each application: high performance printers for production halls, mobile printers for field use, label printers for printing medium volumes and small desktop printers.

Quick serve of customers at the check desk is one of the most important factors in retail sales. Counter **barcode scanners** from our product portfolio are a great choice for achieving higher performance and productivity.

Our team of experienced and trained professionals can advise on your selection, setup and installation of **stationary barcode scanners** designed for high-speed assembly lines and environment with high volume shooting. Stationary readers give you maximum flexibility in most industrial applications.

Our offer includes **label applicators**, which are characterized by ease of use and setup, extremely low failure rate and high speed label application. Contact us; we will propose the most effective solution for your applications.

SOFTWARE SOLUTION

We develop and offer software applications based on modern barcodes and RFID technologies to streamline work processes. Our philosophy is simplicity. The portfolio of DATASCAN also includes professional applications for designing and printing labels, barcodes and plastic cards.

WIRELESS NETWORKS

Wireless technology is really available and reliable solution today. We provide complete high-performance solution in the building, outside the building and in motion, including proposal deployment of equipment in the building and implementation.

CONSUMABLES

Choice of quality consumables influence the printer reliability and print quality. We only work with partners who are among the leading manufacturers of consumables in the area of automatic identification. We can produce and print labels in compliance with strict medical and food standards; we deliver ribbons for printers, plastic cards, RFID tags and cleaning accessories.

SERVICE AND TECHNICAL SUPPORT

Service and technical support are an integral part of our services. With the expertise and experience of our skilled technical team we are able to provide professional and quality warranty, post-warranty and non-warranty service. If you require extra support, we offer a conclusion of the service contract.

Barcode & Mobile Solutions

DATASCAN, s.r.o. is part of the international holding DATASCAN International. We are building our many years of experience in the field of automatic identification on the market since 1992. The expertise of our sales team comes from many years of cooperation with our partners, leading manufacturers of equipment for bar codes. We can design a complete solution for reading and printing of bar codes, 2D codes and RFID. Regardless of project size or budget we propose optimal and efficient solutions applicable in the areas of store management, sales, administration and production. Parts of our product portfolio are optoelectronic sensors and authorized service with technical support.
